

INSTRUCTIONS ASSEMBLY

In which order do I assemble and disassemble the Lalizou?

You can assemble the individual parts of the Lalizou in just a few steps.

1. To do this, you first reach into the mattress insert and pull the interior outwards.
2. Now insert the plastic rail into the provided channel.

3. After that, bring the mattress insert back into the starting position.
4. Then put the pillowcase onto the Babynest-side.
5. Starting with the large circumference, you can now insert the cushion tube into the cushion cover.
6. Then close the separable zipper.
7. Afterwards put the mattress cover over the mattress to insert it into the mattress slot.

To disassemble, simply proceed in reversed order.

Just look at our helpful videos. You can find these on:
